تجزیہ

We are using NLP techniques such as Clustering: to view the grouping of tweets and understand the trends. Users will be able to see just in a glance all the major stories that happened for each cluster.

ABSTRACT

We are focusing on Urdu Tweets and News articles to analyze patterns in Urdu Media publishing. We will use a method for clustering news from mass media such as Newspapers and Twitter. The primary purpose of our project is to explore and use clustering techniques for mass media and obtain the corresponding topic distribution with the help of NLP

NOVELITY OF WORK

In today's news environment, it has become very easy to retrieve information from almost any story. This can lead to information blindness, as the user is limited to the narrow viewpoints of the feeds they accept to follow. This misses the broad panorama that exists outside social media sites such as Twitter and Facebook.
Hence the major goal of this project is to extract some kind of meaning from news stories in order to connect them, understand the subject they're discussing and how close articles are based on the words they use in a programmatic fashion. Our application will cater for the above problems and for that, we are using Natural Language Processing techniques.

PRE-PROCESSING

- Fetching live data from Twitter
- Removing Stop Words
- Removing punctuations and English text
- Removing numbers and special characters
- Lemmatization and tokenizations of Urdu words.
- Applying term frequency and inverse document frequency on Urdu words to evaluate how relevant a word is to a document in a collection of documents

RT @Its_RabiaSays: امپوڑٹڈحکومت نامنظ#ہے!!. 9 "کا شکار لیےفرسٹریشن اس 15 بنایا"

~~RT @Its_RabiaSays:~~ امپوڑٹڈحکومت نامنظ~~#!!.~~ ہے~~"~~ 9 کا شکار لیےفرسٹریشن اس ~~15~~ بنایا"

Words		مشکل	اچھا	نزدیک	خوبصورت	وقت
TF	A					
	B					
TFIDF	A	0.00	0.00	0.29	0.00	0.61
	B	0.00	0.40	0.00	0.60	0.00
